## COMMENTS FROM THE TOWN MANAGER'S OFFICE

Please note elsewhere in this paper a "Notice of Hearing for Re-location of Elm St." to be held Oct. 4th at 2 p. m.

Please note there is no proposed change on that part of Elm St. from Railroad St. to Summer Street. There is a slight change of the right of way from Summer St. to Main St. If this change is approved by the Selectmen at the Tuesday hearing, it will then come before the Town at a Special Meeting to be held in the very near future.

The proposed change will allow the stone wall on the Western side of Elm Street to be considered as the line of right of way. The Town will deed to Gould Academy the land now occupied by the wall.

The Town will receive from Gould an equal amount of land on the Eastern side of Elm St. a narrow strip ranging from one to about eight feet in width. The Town will lose none of the street as it is now used and will gain the narrow strip just mentioned, together with the sum of \$1,500, which may be used as the Town directs.

Cold weather is just around the corner, the teachers tell me they have some children in school who will need clothing and foot wear soon. If you have something unused in your homes you will be very glad to have you bring it to the Town Office and we will help pass it along.

If the employees of the Newton Mill, recently burned, are interested in having a representative of the Unemployment Office in Bethel Tuesday Oct. 4th, please call on before Monday noon.

## MESCO RULES THAT POWER SAWS ARE "TOOLS OF TRADE" FOR TAX PURPOSES

The Maine Employment Security Commission, with the Internal Revenue Service concurring, has adopted the following policy, effective as of Oct. 1, 1955:

"It is the policy of the Maine Employment Security Commission that power saws are to be deemed a 'tool of the trade' accordingly, taxes should be paid on the gross amount paid the individual for his services. Any arrangement with the worker as to power saw use is incidental to operations of the employer."

This has been included in an informational letter sent to all employers engaged in woods operations, together with a similar ruling of the Internal Revenue Service.

This new Policy means that employers should no longer allocate a portion of the wages paid as good it will be made available to the radio station WRUM at Rumford for use on some of their farm programs.

## Newton & Tebbets Mill Burned In Midnight Fire--\$100,000 Loss

Fire of unknown origin totally destroyed the mill of Newton & Tebbets Inc., at West Bethel early Friday morning. The blaze originated between the dry house and mill, near the location of a fire on the preceding Saturday morning, and when discovered by the watchman was well under way. The flames spread rapidly through the frame structure in spite of a modern sprinkler system.

The alarm was first sounded at about 12:10 a. m. Men from town first on the scene were able to save all office equipment and current records also the tractor and trucks.

Within an hour the 180 foot structure and adjoining dryhouse and blanch mill was leveled. Many machines and much stock as well as finished products were lost.

The fire caused an estimated loss of at least \$100,000. Between forty and fifty persons were employed. The mill was spread throughout the village in event of fire elsewhere.

The fire departments of Bethel and Woodstock were called and are to be credited for their prompt arrival and efficient work.

Fortunately there was no wind at the time, as sparks spread over some distance. The fire thus started were stopped with little trouble. Nearby buildings were wet down and damage was confined to the mill property.

The mill was built in 1923 by the Morrill-Adams Company who were engaged for several years in the manufacture of small furniture. In 1938 the property was purchased by Newton & Tebbets, Inc., who have developed a thriving business in the manufacture of dowels and kindred products. Burton Newton purchased the interest of E. Lester Tebbets in the business this year.

Ideas from other editors

From the Catekill Mountain Star, Saugerties, New York: Getting acquainted with and understanding some of the many problems of the publisher and editor of your local newspaper is the best way to establish effective press relations. Like all business places, your newspaper is run by people, and to deal harmoniously with them you should be familiar with their objectives, rules and routine.

Deciding what to publish is one of your editor's most important functions. His decision as to what news to use depends on three facts: 1. What in his opinion constitutes news. 2. What kind of news the public, who buys his papers, like to read. 3. Whether the articles submitted smack of libel.

If you believe you have a story or a news item that should be printed, your editor will be glad to talk with you about it.

Your editor appreciates the cooperation of the public, whether personal news or news of community projects. In the final analysis, the news printed in your local paper is a history of the area in which you live, work, worship and play and will be read and referred to by future generations.

From the Independent Record, Wildwood, N. J.: If ants were provided with a concrete ant hill,

what would they do? In all probability they would start building a regular ant hill next to the concrete one. Ants would perish without castles to build.

Socialism is much like the hypothetical concrete ant hill. It should be a life of security. But it has in the past torn down people's accumulated savings. What if socialism could give cradle to the grave security? That alone would leave man as lost as the ant in a concrete ant hill.

A republic of free men is based on the premise that the individual can build his own castle at his own risk instead of living in a cubicle provided by the state. With incentive as an urge to produce, man pushes himself to the highest standard of living.

The energy of man must find an outlet in building, as much as the ant. The creative spirit cannot be stilled.

From the Harvard Herald, Harvard, Illinois: It has been observed that the possibility of soaking the rich to pay the cost of government went out with prohibition and Emory's Eugene hats.

If the federal government took every nickel of individual taxable income above \$4,000, it would get only a fifth of what it is spending each year.

## Economic Highlights . . . . .

Happenings That Affect the Future of Every Individual — National and International Problems Inseparable from Local Welfare.

As a general principle, practically everyone agrees that there is no such thing as an indispensable man. As a practical matter, however, any GOP political strategist, in a frank mood, would tell you that there is one man who comes mightily close to being indispensable and his name is Dwight D. Eisenhower.

All kinds of polls and surveys and studies have been made in preparation for the crucial 1960 general election. Most, if not all, have come to the same conclusion. One conclusion is that President Eisenhower, the individual, is far more popular than the Republican Party, the institution. Another is that, as of now at any rate, he could defeat any potential Democrat candidate in pretty much of a walk. A third is that no other Republican in the public eye has anything resembling the President's popular standing. It is not an exaggeration to say that many of the experienced political observers are convinced that without Eisenhower there will be a Democratic sweep next year — while, with Eisenhower, the Republicans will certainly keep the President and very possibly regain control of Congress.

The opinion is general that, even though it may go against his personal desires, the President will run. The Democratic leadership believes that his present strategy, therefore, is inevitably devoted to seeking issues that are not only anti-Republican, but which will undermine the President's personal popularity and weaken public confidence in his policies and his ability.

### THE LOW DOWN

FROM

### HICKORY GROVE

I have grown again in my dictionary — just about my favorite book, maybe next to Aesop — and got over into the "M" section. It means "manners" and states and brothers, any essayist — had of worse or who — who could not come up with 500 words on the subject, should get out of the business.

"Good manners" is distinguished department. The country is full of nice people with good manners but the ill-mannered ones who curdle the soup are the problem. And the first place to look is in the nursery where little kids and little boys are being their new surroundings that right here is where manners and papa should lay aside Mr. Frost's musings and pick up a timber stick, not too heavy — and set aside at least 14 years for each offspring's bringing up. He don't instill good manners — He don't type in your little pills and pay by farming out the job to somebody. The baby after takes the short end — anything for peace and quiet to back with good manners.

And along with the subject of manners tied in definitely with same — delinquency books. Our new superintendent, Doctor Harry, among a layman recently when he told delinquency experts on the parents' doorstep. Imagine such a thing — me and Uncle Harry in a sitting — Wonders don't cease.

Yours with the low down,

JO SEMRA

idea.

That has proved a formidable task. There is no real issue over foreign policy — both the Republican and Democratic leadership agree on the fundamentals. The "Eisenhower Depression" issue of a year or so ago has disappeared without a trace — production, employment, wage levels and other standard business indicators are at or near record highs. Earnest effort is being given to dramatizing and selling the idea that this is a big business administration, bent on giving away priceless natural resources, such as oil and water, to greedy interests. But no dispassionate observer can see where this has made any real headway or is likely to. And the attempt to turn Dixon-Yates into another Teapot Dome died aborning — the facts simply did not substantiate the charges.

There also have been more subtle efforts to change public opinion. The Democratic Digest has drawn a fanciful parallel between the Grant and Eisenhower Administrations, even bring in Grant's devotion to fast horses and Eisenhower's to golf. This caused Fortune to say editorially, "If that is the best the Democrats high command can muster, Mr. Eisenhower can afford to spend a lot of time at golf and fishing..."

The Democrats are not to be criticized for their zealotry. It is their duty as well as their right to search for effective issues. The Republicans have found themselves in a similar position in past times and have necessarily followed similar tactics. But, to date, it is clear that no effective counter to the Eisenhower prestige has been found. Columnist Frank Kent described the situation accurately when he told of a discouraged Democrat saying: "What we need is some kind of smear that will stick. But the d— fellow seems smear-proof."

### GLASS ROOTS OPINION

Wibbank, G. D., Herald Advance: "Walter H. Gamble... a past president of the Edison Electric Institute... pointed out that electric company customers pay 14 cents of every electric bill dollar in federal taxes and another 9 cents for state and local taxes. Government power agencies are exempt from federal taxes and make only token payments in lieu of state and local taxes. Thus, the customer of an investor-owned company contributes to the cost of government when he pays his electric light bill but the customer of government power agencies gets off scot-free. These facts constitute basic inequities that should be corrected, not perpetuated by a TVA bond scheme."

Pampa, Texas, Daily News: "Everytime the government gets into business of trying to distribute the milk of human kindness, the milk turns sour. There is no substitute for individual responsibility."

### BETHEL MIDGET BALL CLUBS ENJOY BANQUET

Last Friday evening, the Bethel Midget Ball Clubs enjoyed a steak banquet at the Congregational Church dining room. This was also to honor the Bethel team's championship in the Junior Pine Tree League, 1955.

The dining room was decorated in fall colors with baseball caps, bats and balls as centerpieces on the tables. Banners for each team in the Bethel Club, the Junior Pine Tree League Team, Red Sox, and Braves, were hanging over the tables to designate each team's place, with the champions at the head table. Certificate of Awards, awarded to each member of all three teams, were used as place cards. Eight members of the Yankees, the young beginners of the club, were also present.

A banquet dinner of steak, mashed potatoes, carrots, hot rolls, fruit salad, apple pie and ice cream, chocolate milk and coffee was served. Mrs. Paul King entertained the boys on her accordion, and the boys joined her with singing.

He spoke, especially of Bud and Shirley Clough and called them "Mr. and Mrs. Baseball" for their untiring efforts to promote boys' baseball for Bethel. He called on them to make a surprise announcement. They, then, presented to the championship team a trophy given by the Coca-Cola Bottling Co. In behalf of Fred Wight of Norway, Commissioner of the Oxford County Baseball League, and who was unable to be present, Donald Christie told the boys about a trophy which will be given to them from the Oxford League. These trophies are to be on display at Spec's Barber Shop at a later date and thereafter, permanently displayed at the Crescent Park School. The champions will also receive green and white jacket emblems from the Bethel Club. Bud Clough thanked his coaches for their support, and also the parents who had worked "behind the scenes" to help forward the baseball program this summer.

### GRASS ROOTS OPINION

Swanville, Minn., News: "The measure of a man's living standard is how much he can buy with the proceeds of his labor. Taking the wages per hour of the average worker in three countries and equating them to the cost of things they buy, it is estimated that the average American can buy a suit of clothes for 15 hours work, while a Socialist-inclined Englishman works one and one-third weeks for a suit, and a Communist-controlled here that can be turned over."

### Russian Three weeks.

Indio, Calif., Date Palm: "We have long known that Uncle Sam was the biggest land owner in California. But it wasn't until recently that an inventory... revealed that his holdings amount to 46 million acres. That's 56.4 per cent of the State's total area. The administration has promised great speed in turning over surplus lands to the states or individual citizens. There must be plenty here that can be turned over."

## DALE CARNEGIE

AUTHOR OF "HOW TO STOP WORRYING AND START LIVING"

A HOPEFUL and commonsense thought for middleage—and after—comes from Alyce Canfield, in Your Life magazine. She says that Glamour begins at forty, which would seem to conform to the European idea where they do not attribute most of the good things to youth as we are inclined to do in our country.

Then she goes on to enumerate people who have reached middle age and still enjoy living, without fear of the future, including Claudette Colbert, who admits to being in the forties, and others maybe as old, I. e., Joan Crawford, Bette Davis, Marlene Dietrich, Clark Gable, Van Johnson, Frank Sinatra, Humphrey Bogart, Spencer Tracy, Gary Cooper.

But there are others than moving picture stars (who would seem naturally to be the ones to have their lustre dimmed early). Many of our older men and women are still holding their own though now past middleage. Statesmen, painters, writers, and thousands of business men who have applied commonsense measures to living and are in the best of health and going strong.

If a man is as he thinks, it behooves us to think health, to keep cheerful, relax periodically, and keep young at heart through holding to interesting work. Think over those you know who are no longer classed as young. Do they not seem to follow these suggestions?

The Supervisors of the Oxford County Soil Conservation have received the new tree planter that was ordered earlier in the fall. The planter was shipped from Illinois and arrived in South Paris last Wednesday. The Supervisors, the Farm Forester and myself are all greatly impressed with this new planter and we feel that it will be of considerable help in getting a larger number of trees planted in the County. This new machine is considerably heavier than our present model and will be used in the more difficult planting sites. We hope to have a series of demonstrations this fall so that more of you may have an opportunity to see the planter in operation.

There is a good supply of trees at the State Nursery in Orono and those interested in tree planting should contact the Forester, Mr. Sumner Burgess, of Dixfield, or the Soil Conservation office at South Paris. If you are interested in planting trees this fall, or next spring.

Last week was another busy week and some of the projects completed were a sod waterway on the Eino Kuvaja farm in Greenwood; a pond on the Phil Plummer farm in Paris; a pond at the Western Maine Sanatorium farm in Hebron,

Head John 15:12-17.

Henceforth I call you not servants...but I have called you friends. (John 15:15)

ONE day a little girl, well known to me, invited a friend into her home to play. Looking at a picture on the wall, the small visitor asked, "Who is the person in the picture?"

"That is Jesus," came the reply.

"Do you know Him?" asked the visitor.

"No," said the small hostess, "but my father does, my father is a personal friend of His."

Christ is not merely a figure of past history. True He walked through the fields of Galilee and the streets of Jerusalem long ago. He was a good man who lived and died in the ancient world. He is also the living Christ of today.

an unfailing friend and constant companion with whom we may walk in fellowship and in whose strength we may face each day.

He does not lift us out of life, remove our burdens or deliver us from the experience of death. He shares with us our life of inspirations, burdens, joys, and sorrows. In love He goes with us and gives His sure help. We are not alone. He is our available friend.

Prayer

Our Father, increase our response of faith. Quicken the surrender of our wills. Give us open hearts of love that we may know the friendship of Thy Son, our friend, in whose name we pray. Amen.

Thought For The Day

Christianity is the gift of friendship in which Christ is both the giver and the gift.—E. Lyall Williams (Australia)

START EARLY, SHIP ONLY BEST MAINE POTATOES, SAYS HAZLETT

"Start early, ship the best, divert the rest" are the keys to success in marketing the 1955 Maine potato crop, says Arling C. Hazlett, Extension Service economist in marketing, University of Maine.

With a bumper crop of fine potatoes, such a program would not only provide a good foundation for future years, but the effects such a program might have on the marketing of the 1955 crop might prove to be a pleasant surprise, points out Hazlett.

A program of shipping top-grades of washed potatoes—grades comparable to Maine Mediums and Super Spuds—would be painful at the start on the present market, but would pay handsome dividends later on, explains Hazlett. If Maine potato farmers and shippers want people to eat more Maine potatoes they must make the Maine potatoes available to them over a long period of time.

By shipping only the best grades, it would soon be possible to establish a definite preference for Maine potatoes on the part of consumers.

"Start early, ship the best, divert the rest," making full and correct use of the potato diversion program, suggests Hazlett.

Bear River Grange No. 285 met at their hall Sept. 24 with the Worthy Master in the chair. As there was very little business to attend the meeting was turned over to the Worthy Lecturer, Smokey the Bear was the entertainer and he sure did a good job. We had a small army of boys and girls there which was what we wanted. We fed them on ice cream, cake and cookies and hope they went home happy and will come again. Some of the teachers were our visitors along with our good friends "The Bartletts" of East Bethel. Next meeting will be "Boosters Nite" and we hope for a good crowd. There will be a public supper—of Bean Hole Beans and vegetables, salads and pies. If you want to fill your vest pocket with beans for your breakfast O. K. go ahead. There will be a free program beginning at 8 and that's going to be a Super Duper. We hope to have a good speaker with us and one that can sing as well as speak—so really you cannot afford to miss it. There will be music and all sorts of things going on so don't forget its October the 8th.—Eva Yates, cor.

TAXPAYERS URGED TO KEEP EXEMPTIONS RECORDS CURRENT

Taxpayers subject to withholding tax should be careful that their exemption records are current. District Director Whitney L. Wheeler of the Augusta office of the Internal Revenue Service has warned one of the common difficulties experienced by the service is straightening out erroneous withholding tax certificates.

Keeping one's employer posted concerning exemption status benefits both the employer and revenue service, Mr. Wheeler pointed out. It enables the employer to maintain accurate records in both his own bookkeeping accounts and in his payment of these taxes to the service. The revenue service is enabled to make more quickly accurate analysis of the taxpayer's return.

If a taxpayer's exemptions have changed, he should obtain at once a new certificate (Form W-2), fill it out and return to his employer. This should be done immediately especially when dependency changes have an application to the current year.

Such factors as marriage, divorce, the birth of a child or assumption of the support of a dependent may alter an individual's tax status. Taxpayers who find that their

## SCHOOL NEWS

## Grade Four

We are sorry Mrs. Ring has been out of school since last Thursday. We enjoy having Mrs. Morton for our teacher during Mrs. Ring's absence. Miss Ballard's room had perfect attendance on Sept. 20, 21, 22 and 23.

## Grade Six

For our Maine display we have samples from Davis' mill, Grafton Lumber Co., Hanover Dowel Co., and Newton-Tebbets Mill. We are all sorry for the fire which destroyed the Newton-Tebbets mill. Roy Newton is in our class. His picture, along with his father's and brother, Allen's, was in the Portland Press Herald. Peter Davis won a football the first day of the magazine sale for bringing in the largest amount of money. Peter also brought a chrysalis last week. We are patiently waiting and watching for the butterfly to appear. Wayne Perry won a basketball Monday for being the highest boy salesman in our magazine contest. We got Cuddles, the pink dog, on Monday because our room brought in the most money. We are going to have an Audubon Club. If we can get 10 members. By Friday, all the school insurance must be in. We have had very good attendance since school began. Only five have missed any school. Reporters, Elizabeth Waldron and Virginia Tibbets.

Grade Seven  
Mr. Helms' room is coming along quite well on their science projects which they separated into three groups which are minerals, solar system and magnetism. Mrs. Gunther's science project is all and its pressure. In English we are learning about personal pronouns. We are mostly revolving in arithmetic. On the magazine campaign the two rooms together have brought in \$7.50 and there is still more to come. Reporters, Mary Willard and Dixie Lea Brown.

Grade Eight  
At a class meeting of the eighth grade of CPS held Friday morning, it was suggested that we go to Shelburne Inn to roller skate. David Myers was appointed to find out the cost of renting a bus. It was made a motion and accepted that we have a finance committee.

Mrs. Lurvey's room challenged Mr. Pillsbury's room to an Arithmetic duel. Penny Davis was appointed Chairman for Mrs. Lurvey's room and Barbara Mundt, chairman for Mr. Pillsbury's room. Reporters, Douglas Rice.

Circular 245 of the Maine Extension Service tells how to "Tight the Fire on Your Farm." It's available from county and state offices of the Extension Service in Maine.

Similarly, persons with small additional incomes beyond that on which tax is withheld may follow this practice to avoid heavy tax payments at the April 15 deadline each year.

Most employers will be able to advise employees on their exemption status. The district revenue office will provide information for those who cannot obtain it otherwise, Mr. Wheeler said.

"I REMEMBER"  
BY THE OLDTIMERS

From Mrs. Maud Sawyer, Hamilton, Montana: I remember the first school that I attended on the banks of the Gallatin River in Montana when I was six years old, in 1878.

It was the first school in that district, which had just been organized. The building was of newly hewn logs. The door was made of unplanned lumber. There were two windows on either side of the building. We had some kind of a blackboard. The desks were homemade and we used slates and pencils. There were nine children attending. We used McGuffey's Reader and the Barnes History. I still have them. They are prized possessions.

Miss Lay was our first teacher. She had been teaching in Missouri and came out to Montana to teach there. She told us about an experience she had in Missouri as she was on her way home from school late one afternoon.

She was on horseback, riding leisurely, when she heard a panther scream. It came so near that she could see it. Terribly frightened, she pulled the veil from her hat and threw it down. The panther stopped and tore the veil into shreds. Then it caught up with her again and she threw her hat to it. Curious, it stopped to look at the hat. While it was doing that she urged her horse on as fast she could and never saw the panther again.

She said that she had heard of others using that method of escape when being followed by a panther.

Central Maine Power Company thanks its customers in West Paris, West Sumner, Greenwood, Woodstock, Newry, Gilead and the Bethel area for their understanding attitude during interruptions of power on September 11 and 18. On those two Sunday afternoons, 11 Central Maine Power crews (including over 100 men) rebuilt 6½ miles of high-voltage line.

While some crews strung new wire, others replaced damaged insulators, greased switches and inspected substations. Every potential source of future trouble that could be discovered by inspecting the line with field glasses was eliminated.

Because of the cooperation of customers in territory affected, Central Maine Power linemen were able to accomplish in 7 hours 46 minutes of planned interruptions, work which will result in improved service with less chance of interruption in the future.

The 10 Commandments  
of Safety

1. Treat every gun with the respect due a loaded gun. This is the first rule of gun safety.
2. Guns carried into camp or home, or when otherwise not in use, must always be unloaded, and taken down or have actions open; guns always should be carried in cases to the shooting area.
3. Always be sure barrel and action are clear of obstructions, and that you have only ammunition of the proper size for the gun you are carrying. Remove oil and grease from chamber before firing.
4. Always carry your gun so that you can control the direction of the muzzle, even if you stumble; keep the safety on until you are ready to shoot.
5. Be sure of your target before you pull the trigger; know the identifying features of the game you intend to hunt.
6. Never point a gun at anything you do not want to shoot; avoid all horseplay while handling a gun.
7. Unattended guns should be unloaded; guns and ammunition should be stored separately beyond reach of children and careless adults.
8. Never climb a tree or fence or jump a ditch with a loaded gun; never pull a gun toward you by the muzzle.
9. Never shoot a bullet at a flat, hard surface or the surface of water; when at target practice, be sure your back stop is adequate.
10. Avoid alcoholic drinks before or during shooting.

## WORTH REPEATING

In 1935 a U S farm turned out enough food to support ten people. T. produces sufficient to support. In 1935 farmers had about 100 tractors. By 1954 they had 1,000. The figures could be multiplied to many times. Our farms are getting to the point where they look like factories, but if they and mechanizing trends their present pace, they in fact one day be factories. Annapolis (Md.) Capital.

## WORTH REPEATING

In 1935 a U S farm worker turned out enough food and fiber to support ten people. Today he produces sufficient to supply 18.

In 1935 farmers had about a million tractors. By 1954 they had 4.4 million. The figures could be extended to many types of farm machines....Our farms may never get to the point where they look like factories, but if productivity and mechanizing trends continue their present pace, the farms may in fact one day be factories.

## THE BAFFLES

Here is a hint which may help drivers to avoid accidents involving youngsters: Indications that children are near are such things as residential streets, parks, playgrounds, schools, childish shouts and laughter, toys, wagons, and bicycles. Whenever we notice any one of these things, we should be doubly alert for children who may dart into the street without warning, our Governor's Committee on Highway Safety cautions us.

## Parents' Week End Program

Gould Academy will celebrate Parents' Week End on Saturday, October 8. The Academy student activities will begin on Friday, Oct. 7, with a football rally on Barr Field at 7 p. m. A program of cheering, singing, speeches, and instrumental music has been arranged for this occasion. This will be followed by a rally dance under the supervision of Miss Emily Tickell, physical education director for girls in William Bingham Gym at 8 o'clock. Saturday offers a diversity of activities which promises to attract to the campus the largest gathering of parents, trustees, and guests in the history of the school for a Parents' Day. With the largest enrollment of students on record, the Academy is making preparations to accommodate this record breaking crowd. All parents and guests will be registered by committee members upon arrival and presented with a program listing the events for the day. The football game at 2 p. m. pits evenly matched teams between Gould and Norway. Following the game there will be a tea and coffee for Parents, Trustees, faculty and guests in William Bingham Gym while the students and their guests are enjoying a tea dance in Holden Hall. Gould Drops Opener 20-0

Mexico packed too much power, speed, and experience for Gould last Saturday as the Huskies went down to defeat in their opening game of the season. Fullback John Christakos and Joe Blanchard were the Pinto ground gainers. Blanchard scored all three touchdowns for the winners while his brother, George, made the tackle which resulted in a safety and the final two points.

Gould could make no sustained drives and never threatened the

home team's goal line. Captain Howard Brush received an injury early in the first period that sidelined him for the rest of the game. His loss was a tough one for the Gould defense. Outstanding on the defense for the loser was Terry Russell.

South Paris Here Saturday

Gould Academy will open its home stand Saturday, meeting South Paris on Alumni Field at 2 p. m. The Huskies went down to a 20-0 defeat at Mexico last Saturday while the Cardinals were gathering in their second victory of the season. The Paris eleven easily defeated Bridgton High and came through with a 7-0 win over Norway. The Bethel team will have to show much improvement to come out on top here this week end.

Some changes will have to be made in the starting lineup due to injuries sustained at Mexico and in practice this week. Quarterback Willard will not be available this week and his replacement will probably be Jack Reid. Captain Howard Brush, who played only a few minutes in the first quarter at Mexico will be ready to

start again. Roberts and Barlow are both sidelined for some time while Paul Murphy is still a doubtful starter.

South Paris is a much improved team from last year. It should be a real thriller with the mod going to the undefeated Cardinals.
